Meister Meister is used with bedding plants, foliage plants, flowering plants, cut flowers, vegetables and turf. Three longevities to choose 3 month, 9 month and up to 13 months

Promotes balanced growth for all varieties of plants, from large trees to delicate ferns. The Nitrogen in Nitroform is released by microbial activity in the soil and thus promotes healthy root growth without promoting soft weak leaf growth. Nitroform is a non burning, non leaching source of nitrogen that lasts between 8-12 months regardless of temperature.

Macracote Potted Colour Blend Ideal for 'Potted colour', and short term plants and top dressing

Complete Powdered Trace Elements designed to correct trace element deficiency in soils and soil less media.

TYPHOON PLANTER TABLETS "One Tablet, One Tree One Year" The environmentally sound solution for young tree establishment, non burning, non leaching. Suitable for all kinds of landscape projects, as well as commercial forestry and fruit tree crops, e.g. Olives, vines etc. Available in 10 & 20gram applications, special formula's made on request.
